

MYOPIA MANAGEMENT

MYLO

INDIVIDUALLY CRAFTED

SILICONE HYDROGEL

MYLO is an individually crafted silicone hydrogel contact lens specifically designed for Myopia Management. It is powered by the Brien Holden Vision Institute's patented Extended Depth of Focus (EDOF) technology, which slows myopia progression and supports a comfortable acclimation to the lens, enhancing the overall wearing experience. A monthly disposable contact lens, MYLO features high water content and low coefficient of friction, which combine to improve comfort throughout the day. Its wide range of parameters and low elastic modulus ensure an excellent fit and easy handling, especially for the youngest contact lens wearers.

 **EXTENDED DEPTH OF FOCUS**

PARAMETERS

BASE CURVES (mm)	7.10 to 9.80 (0.30)
DIAMETERS (mm)	13.50 to 15.50 (0.50)
SPHERES (D)	-0.25 to -15.00 (0.25)

MATERIAL

TYPE	Filcon 5B (60) [75%]
WATER CONTENT	75%
FIRST CLASS UV FILTER	Yes - blocks at least 93% of UVA and 99% of UVB light
CENTRAL THICKNESS (-3.00 dpt)	0.10
DK (ISO 9913-1-1998)	60
DK/T (-3.00 D)	60
HANDLING TINT	BLUE
MODULUS	0.29
PACK SIZE	3 & 6 Lenses
MANUFACTURING PROCESS	LATHED
CoF	0.09

OPTICAL DESIGN

POWER PROFILE FOR 1.50 ADDITION
