

- For almost 30 years, BostonSight has developed pioneering scleral lens technology that restores vision and relieves symptoms for thousands of patients around the world.

90%

of fits achieve optimal vision with the built-in front surface eccentricity

75%

of fits achieved with the Standard, quadrant-specific trial lens from the fitting set

60%

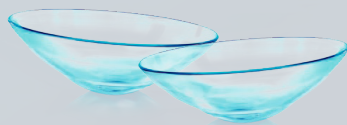

of fits require no changes in haptic design

- Vaults the entire cornea, covering corneal irregularities while resting completely on the less sensitive conjunctiva/sclera
- Continuous hydration reservoir hydrates the eyes all day long, reducing irritation
- Fluid-ventilated, gas-permeable composition promotes adequate oxygenation for optimal health and the repairing of damaged tissue

BOSTONSIGHT AT A GLANCE

- #1 in scleral lens research & education in the U.S., #2 worldwide
- Data-backed, evidence-based lens design
- Unparalleled, comprehensive support to provide a superior fit
- Up-front pricing, no additional costs — making BostonSight SCLERAL the most competitively priced lens on the market

DIAMETERS	16.0mm, 16.5mm, 17.0mm, 17.5mm with Smart360, 18.0mm, 18.5mm, and 19.0mm
SPHERE POWER	-20.00 Diopters to +20.00 Diopters
SAGITTAL HEIGHT	2.0mm to 6.0mm in 0.1mm (50µm) steps
PERIPHERAL HAPTIC SYSTEM (PHS™)	Customizable
OPTIONS	<p>SmartChannel®:</p> <ul style="list-style-type: none"> Ventilating Channels Vaulting over anatomical obstacles Reducing suction <p>Front surface toric Rx</p>
PREFERRED MATERIAL	Optimum-Extra, Optimum-Extreme and Optimum-Infinite by Contamac
OTHER MATERIAL OPTIONS	Boston® EQII, Tangible Hydra-PEG available
